PROFESSIONAL SUMMARY

Master of Computer Applications (MCA) graduate (CGPA 8.22) from Savitribai Phule Pune University specializing in Data Engineering, Data Science, and Analytics. Hands-on experience building end-to-end ETL/ELT pipelines using Databricks, PySpark, Delta Lake, dbt, and Medallion Architecture. Proficient in advanced SQL (CTEs, window functions, query optimization), Python, and cloud data platforms (AWS Glue, Athena, Redshift, S3). Skilled in data visualization (Tableau, Power BI), machine learning (Scikit-learn), and generative AI deployment. Completed a Data Analytics virtual internship with Deloitte. Seeking an entry-level Data Engineer / Data Analyst role to build scalable data solutions and drive data-informed decisions.

TECHNICAL SKILLS

Languages: Python, SQL, Java

SQL Expertise: Advanced SQL, Window Functions

Data Engineering: PySpark, Databricks, Delta Lake, ETL Pipelines, Unity Catalog, dbt

AI & ML: ML Concepts, DL Concepts, RAG, Scikit-learn

Analytics & BI: Pandas, NumPy, Matplotlib, Seaborn, Tableau, Power BI

Databases: MySQL, PostgreSQL, MongoDB

Tools & Platforms: AWS, Azure, Jupyter Notebook, Google Colab, HuggingFace Spaces, VS Code, Docker

INTERNSHIP EXPERIENCE

Data Analytics Virtual Intern — Deloitte

June 2025 | Remote

- Analyzed real-world corporate datasets to uncover patterns and derive actionable business insights using structured reporting workflows aligned with industry standards.
- Completed task-based exercises in forensic technology and data analysis, practicing data-driven decision-making in a simulated enterprise environment.
- Interpreted and visualized data to support reporting deliverables, gaining practical experience with analytical thinking and business communication.

PROJECTS

End-to-End Data Engineering Pipeline

Tech Stack: Databricks, PySpark, Delta Lake, SQL, Unity Catalog

- Designed and implemented a complete Medallion Architecture (Bronze, Silver, Gold layers) for an e-commerce dataset, covering raw CSV ingestion, data cleaning and validation, and Star Schema modeling with denormalized analytical views.
- Wrote advanced SQL queries using CTEs, window functions, and aggregations to generate KPI insights across Region, Category, Brand, and Time, including monthly and hourly trends, top brands, and weekend vs. weekday sales.
- Leveraged Unity Catalog for data governance and PySpark for scalable distributed processing, enabling analysis of 100,000+ transaction records.

NYC Taxi Medallion Pipeline — dbt on Databricks

Tech Stack: dbt, Databricks, Unity Catalog, SQL

- Built a full dbt project implementing Medallion Architecture (staging, intermediate, fact layers) on Databricks with Unity Catalog (nyc_taxi_catalog.nyc_taxi_schema).

- Resolved real-world data engineering challenges including surrogate key collisions, ephemeral CTE naming conflicts, and missing seed tables in a dbt-databricks 1.12.0 environment.

PySpark ETL — NYC TLC Pipeline

Tech Stack: PySpark, Databricks, Delta Lake

- Built a five-notebook Medallion Architecture pipeline (ingestion, cleaning, transformations, aggregations, export) on Databricks Community Edition using real NYC TLC January 2024 data.
- Diagnosed and resolved serverless-incompatible patterns (cache(), approxQuantile(), RDD operations) and cross-notebook variable and table name mismatches.

Netflix Movies & TV Shows Analysis

Tech Stack: Python, Pandas, Matplotlib, Seaborn, Power BI

- Analyzed Netflix content dataset to uncover trends in genre distribution, content type breakdown, and release patterns over time using Python exploratory data analysis (EDA) and visualization.
- Built an interactive Power BI dashboard summarizing content KPIs, making findings consumable for non-technical stakeholders.

Text-to-Image Generation App

Tech Stack: Python, Stable Diffusion, HuggingFace, Gradio

- Integrated a pretrained Stable Diffusion model from HuggingFace to build a text-to-image pipeline; deployed as a live public demo on HuggingFace Spaces.
- Developed an interactive Gradio UI enabling natural language prompt-to-image generation, demonstrating practical knowledge of diffusion models and transformer architectures.

EDUCATION

Master of Computer Applications (MCA)

Savitribai Phule Pune University, Pune, Maharashtra | 2024 – 2026

- CGPA: 8.22

Bachelor of Computer Applications (BCA)

Punyashlok Ahilyadevi Holkar Solapur University, Solapur, Maharashtra | 2021 – 2024

- Percentage: 83.97%

CERTIFICATIONS & COURSES

- **Python for Data Science** — NPTEL Online Certification (Jan 2025 – Feb 2025): Python programming, data manipulation, analysis, and visualization techniques.
- **Azure Data Engineering End-to-End Course** — Udemy (May 2026): 77.5-hour course covering end-to-end data engineering pipelines on Microsoft Azure.
- **Programming in Java** — NPTEL Online Certification, Elite, IIT Kharagpur (Jan–Apr 2026): Scored 84%; 12-week course, 4 credits recommended.

RESEARCH PUBLICATION

The Rise and Dominance of Cricket Over Other Sports in India

Published in IRJMETs, Impact Factor: 8.187 | October 2025

- Peer-reviewed paper examining historical, social, economic, and cultural factors behind cricket's dominance in India; analyzed survey data from 331 respondents using thematic analysis.
- DOI: 10.56726/IRJMETs84045. Co-author: Prof. Rubina Sheikh.

ACHIEVEMENTS & ACTIVITIES

- Published peer-reviewed research paper in an international journal (Impact Factor 8.187).
- Active GitHub contributor with publicly deployed live projects on HuggingFace Spaces.
- Consistent self-learner in data engineering, machine learning, and analytics through end-to-end hands-on project building.

LANGUAGES

English, Hindi, Marathi, Kannada
